

Assignment - 12

Bookmarks & Drill Through

Objective – Power BI Desktop, Cloud Service and End to End Workflow**Use Case** – Working with Bookmark as action**Source** – Zoo**Analytics** – Create Bookmark**Report/Dashboard** – Bookmark as action

- Try to make a report which has a page for each kind of Image. When you click the image of that creature you will see all the animals of the same type:

- To get you started look in the above folder to find the three images used. Note the names of the images. Create a page with a table for each:

Type(s) Primary

is Fire

Filter Type

Basic filtering

☐ Select All

☐ Bird 1
 ☐ Bug 12
 ☐ Dragon 3
 ☐ Electric 9
 ☐ Fairy 2
 ☐ Fighting 7
 ☒ Fire 12
 ☐ Ghost 3
 ☐ Grass 12

☐ Require single selecti...

Use a page or visual filter to make each page about only one type.

This page is for the fire lizard.

- When the pages are all created, hide them so that the only way user can reach the page is by clicking the relevant image on the first page.

Grass monsters			
National Pokédex number	English name	Evolves into	Japanese name
069	Bellsprout	Weepinbell (#070)	Madatsubomi
001	Bulbasaur	Ivysaur (#002)	Fushigidane
102	Exeggcute	Exeggutor (#103)	Tamatama
103	Exeggutor	Does not evolve	Nassy
044	Gloom	Vileplume (#045)	Kusaihana
		Bellossom (#182)	
002	Ivysaur	Venusaur (#003)	Fushigisou
043	Oddish	Gloom (#044)	Nazonokusa
114	Tangela	Tangrow (#465)	
003	Venusaur	Does n	
071	Victreebel	Does n	

Duplicate Page

Rename Page

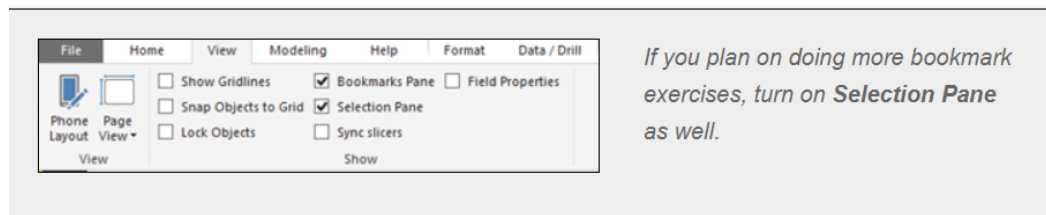

Delete Page

✓ Hide Page

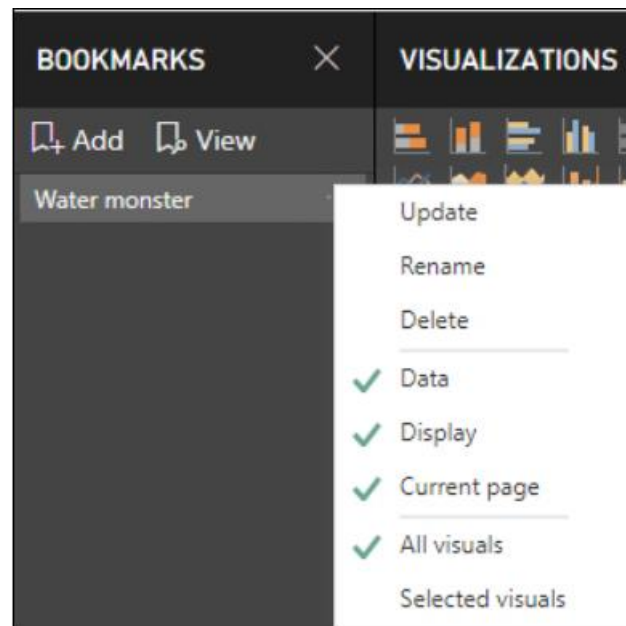

Creatures
Water
Grass

Don't try and hide all the pages. One must remain visible - otherwise how will they get to the hidden pages!

- To create the bookmarks make sure you have the bookmark feature turned on in the View tab:

- Now choose the first page to create as a bookmark, and choose Add in the Bookmark Pane:

Leave all the other options ticked for the time being. Name the bookmark after the page.

- Clicking on the turtle should now take you through to the water page we created earlier
- Adding a back arrow which returns you to the first page of the report. Use the type Back instead of Bookmark when creating the Link.
- Save & Publish as Zoo

Result – Bookmark with Image action
