Objective: Power BI Desktop, Cloud Service and End to End Workflow.
Topic: Charts.
Exercise: Show a chart comparing films when you click on each genre in a tree map.

- Open the Power BI report in the folder. It contains three tables, giving films, their directors and their genres.
- Create a tree map visual based on the table of genres:

- Add a column chart showing the length of each film, and get this to be filtered when you click on a genre. Here's what you should see, for example, when you click on the Sports genre in the tree map visual:
